The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up..Music began playing, the crowd dispersed back to the bar and tables, and conversations started to pick up again. Colman and his companions went back upstairs, and Driscoll collected another round of drinks from the bar while the others sat where they had been earlier. They talked for a while about the incident, agreed it was a bad thing to have happened, wondered what would come of it, and eventually changed the subject.. "Plights and pickles. Troubles. Some of us get 'em served one at a time on a little plate, and some of us. Stern's eyes smoldered. "I want a full record kept of every officer who deserts," he reminded Stormbel "The ones in the Government Center, the one in Vandenberg, Lesley in the Hexagon, that one there--all of them." But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it."..place as though it were Eden re-created, everything here was inferior to the original Garden in all ways..She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for.Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Stern or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Stern wasn't so strange. And it didn't seem so unnatural that she should have stayed near Stern after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing."You said you've only got until your next birthday, and then all bets are off."..fantastic and unlikely, might be waiting for you in a closet..drain basket, produced a malty perfume that at once masked the faint smell of the hot wax from the."Who said anything about them? Colman nodded. He wouldn't have risked their deciding to fire first either. Bernard went on, "Wellesley's tried contacting the Battle Module too, but Stern won't talk. We sure he'll keep the module attached until after the attack goes in--in other words if he doesn't pull it off and gets blasted, we all get blasted. The same thing applies if the Chironians decide to press the button. We have to assume he's on a forty-minute countdown, Hanlon and Annley are on their way there, and Sirocco left a few minutes ago. Borftein is sending through everybody he can scrape together. What are the chances?""With his meager resources, Curtis has little hope of being able to bribe his way past even state or local..He wants the coins, too, but he doesn't touch them.
