Brow dripping, face slick, body clammy: Leilani reeked of sour sweat, no heavenly flower now. On her: "Sure. It's on the lakes." "Me, on the other hand? I've got one pretty name followed by a clinker like Klunk. Half of me is sort of. As she crossed the next backyard, where earlier her mother danced with the moon, Leilani admitted that. "How-how could you justify it?" "I trust we'll all stay friends and keep in touch," Eve said. Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." "already be dead." "I'm not sure that I agree as much as I thought," Kalens told him. "Stern may have a point. We should try it his way to begin with at least. We don't have to stick with the plan indefinitely." "had to do what needed to be done." "insufficient to illuminate the boy or to draw the attention of any motorist rocketing by at seventy or eighty. Her kindness has a profound effect on the boy, and she blurs a little as he says, "Thank you, ma'am." With all public bars having been put off-limits to the Mayflower IIs soldiers after the shooting, the party couldn't have come at a better time, Colman reflected as he leaned against the bar and nursed his glass while gazing around the room. Swyley and Stanislaw were behind him in a corner with a mixed group of Chironians and seemed interested in the planet's travel facilities; Sirocco was with another group in the center of the room discussing the war news with another group, and Maddock, looking slightly disheveled, was sprawled along a couch in an alcove on the far side with his arm draped around Wendy, another girl from the Mayflower II, who seemed to be asleep. It was especially nice to get away from the political row that had been splitting the Mission into factions ever since the morning after the shooting. Kalens wanted to impose Terran law on Franklin, Lechat wanted everybody to move to Iberia, somebody called Ramisson wanted to disband Congress and phase into the Chironian population, and somewhere in the middle Wellesley was trying to steer a course between all of them. At one extreme some people were ignoring the directive to remain in the Canaveral area and moving out, while at the other some were supporting Kalens by staging anti-Chironian demonstrations with demands for a get-tough policy. Padawski and the group who had been with him at The Two Moons, including Anita, were being confined to the military base at Canaveral pending a hearing of the charges of disobeying orders and disorderly conduct. In addition Ramelly had been charged with assault, and Padawski with failing to uphold discipline among members of his unit as well as with publicly issuing threats. The threats were the main reason for Padawski's group being confined to base, since some politicians were worried about possible reactions from the Chironians if they were allowed out and about. Colman couldn't see any risk of retaliation, since none of the Chironians that he had talked to attached any great significance to the incident. He only wished more of the politicians would see things the same way instead of blowing the incident out of proportion to suit their own ends. If they had stayed out of the situation and left the Army to deal with its own people in its own way, the whole thing would probably have been forgotten already, he thought to himself. "checkbook." "What's that?" "No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and. ON THE DAY officially designated December 28, 2080, in the chronological system that would apply until the ship switched over to the Chironian calendar, the Mayflower 11 entered the planetary system of Alpha Centauri at a speed of 2837 miles per second, reducing, with its main drive still firing at maximum power. "You're kidding!".The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'-pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles.. "I never said anything of the kind. The whole point is that they are no~ indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too..She continued on her rounds.. Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers .were in the habit of spying through from time to time, and nobody from the unit had done any patrolling since. It was an amazing wedding, let me tell you, though."It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take
